

1. Click on view Profiles, will take you to list of profiles available.

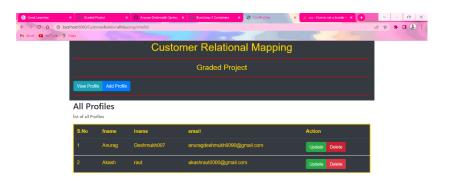

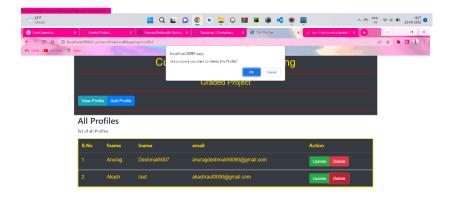

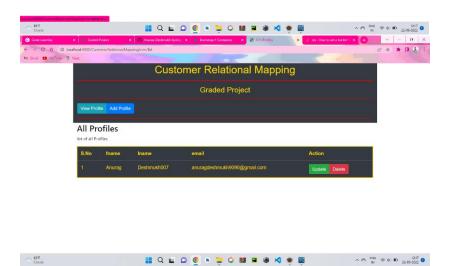

2. Click on Add profile it will bring a form after filling the form hit save it will redirect to list page.

- 3. The profile is added.
- 4. Next, we will delete, here I have click delete button on 2nd profile, it will pop up a warning click ok on warning and the profile will be deleted.

5. Now we update the 2nd record, click update the form will open with fields already filled by the following id content, change the content you want and click save it will redirect to list page and update.
